RELATORE

Abele Quaregna

Thales Alenia Space

With a degree in aerospace engineering, joined Thales Alenia Space in 1998. He was involved as system architect in the development of pressurized modules for the ISS (ESA "Columbus" and payloads) and re-entry demonstrator (ESA EXPERT). As a system engineer, he participated to the Google Lunar X-Prize Italian team, supported ATV program for rendez-vous sensors demonstration and followed the development of the Orion European Service Module. Since 2016, he was involved in the preparatory studies for ESA participation to what is now NASA Gateway; he is currently the Project Design Authority for ESA International Habitation Module (I-HAB) of the Gateway.
